

A Division of Cerebral Palsy of Westchester

BRIDGE School Students Test Assistive Technology Prototypes

On Thursday February 15th, 2018, students from the eNable Club at Byram Hills High School visited our BRIDGE School students to test out their assistive technology prototypes. The high school students have created pencil holders and grips to make it easier to write, an assisted zipper device, a bent spoon holder, and a forearm trough. All of the prototypes were designed using computer-aided design software and a 3-D printer. Our students were very eager to try all the prototypes and give feedback on what could be improved. With assistance from our school's OT department, the eNable Club students will work to make improvements and create new prototypes and return to CPW to test them.

For over 69 years, Cerebral Palsy of Westchester has been the leading non-profit organization in Westchester County, providing essential services to children and adults with all developmental disabilities including autism, neurological impairments, intellectual disabilities, epilepsy and cerebral palsy. It has always been our purpose to help people realize their goals, build brighter futures, and lead more independent lives as members of their community.
